Hey there! I'm Sam, I'll guide you through this wizard.

Select the basic format of your fictional league here. You can choose from a large variety of real-world formats, from 6 to 30 teams in a variety of divisional and conference configurations. Larger leagues will tend to run a little more slowly.

If there are no playoffs in your league, the regular season winner will be considered the champion.

The nation and region selection will have a strong influence on the nationality of the players in your starting player pool. It's best to select the nation or region which most accurately covers the location of all the teams in your league.

Use Initial Draft will make all players free agents and start your league with a draft to fill the teams. Otherwise, teams will start with full rosters.

If you loved The Cat Lady, you will like this game too.

I say like, cause while it's visually and handling-wise a step up and more polished, it feels more linear. Which includes less tasks and fewer interactions with other characters you might've wished for along the way.

The story is still great and worth playing through at least 2 times to pick up scenes and decisions that you missed.

Voice acting and music is perfectly done and placed.

Overall a really beautiful and well-crafted sequel game.

(just a bit shooort <V3). Cute fun game for \$0.50

I wish there were more levels, but the levels there are have good variety. Only needed to restart a few times, so some would consider the levels to be too easy. In my opinion they were borderline-too-easy.

No glitches or technical problems, although I couldn't figure out how to turn the sound off (only the music).. too many glitches in it. Don't Botter save your money. Well, you guys should edit this profile and correct those tags! There is a "co-op" tag which isn't clear enough. The game is playable only local co-op. I thought I can play with my friend online because there is "Co-op" tag, apart from "local co-op." I requested refund already. If there is someone looking for an online co-op experience, I suggest do not buy. Otherwise the game seems nice.

One of the best loco for TS17! Highly recommend when you want something more complex than the default locos. It includes cruise control, PZB90, realistic startup procedures, ... I recommend to all see the manual link on the product page.. I put recommend but it's a slight leaning in that direction. I find I am a little disappointed that several of the cards are duplicates of those in other decks (that always seems to me as a cheap way to create filler for a game) and I am also bummed that the deck is only used with certain game endings. This means if you choose random ending there is a good chance you won't even use the deck in a game (and if you like a specific ending that is not part of the Nether Realm Expansion then you bought a supplement you won't use). Having said all that, if you are a fan of the game like I am, then it is worth the four bucks. :). Hello Friends. Because of this weapon, Australian players are forced to play the low violence version of the game. This weapon is basically a alien probe you stick up people's \u2665\u2665\u2665\u2665\u2665\u2665 and shoot them into the air.

Recommended for new weapon, but im not too happy that Australians are forced to play low violence version thanks to this weapon.. Pretty fun but like many others have said, it's a shame that the 'story' based DLC content is as short as it is. It would be unique if the 'Not a Hero' content releasing in the near future actually had a story behind it. I t hink it might and I'm hopeful that it will be a little more fleshed out with more meat on its bones, so to speak, than some of the banned footage material.. Not as bad as Episode 1, but Tails was sorta wasted in this.. I love this game! I am so sad because I cannot finish it. My game is glitching at the puzzle in the "upside down labrynth" when I am doing the object search. There seems to be no key to open the chest to get the necklace. I have watched a walkthrough for the game, and my game just doesn't have the key to open to chest. Looks like I can't complete this game that I paid for... and I was really loving it too.
